

Senior Consultant in Pharmacovigilance joins Arex Advisor

Karin Nylander is a new senior consultant at Arex Advisor. She joins the team from a position as Safety Data Management Specialist at Pfizer.

Karin holds a MSc in Pharmacy from Uppsala University and has since graduation gained a lot of experience from pharmacovigilance work, predominantly from the Nordic markets. Before joining Arex she worked as a Safety Data Management Specialist at Pfizer and as a Regulatory affairs and Pharmacovigilance consultant at ProPharma Group. She has also worked as a Product information assessor at the Swedish Medical Products Agency.

Karin has a broad experience within pharmacovigilance, spanning from case collection and case management, to database entering, MedDRA coding, and reviewing PSURs and SDEAs. She is also skilled in Quality Management Systems for Pharmacovigilance.

Linda Thunell, CEO at Arex Advisor, says: "We are very happy that Karin has joined the Arex team. She is not only professional and careful in her performance but also very pleasant to work with. When we now are developing and expanding our company's services within pharmacovigilance, we see her as a very important contributor to that work".

About Arex Advisor:

Arex offers strategic advice and operational support in pharmaceutical research and business development. Our mission is to help leaders and companies bring their projects to commercialization. We are passionate about the development process, leading to submission and a successful commercialization of important medicines – which ultimately helps to improve the lives of patients.
