

## Quality Assurance Expert strengthens Arex Advisor's Quality team

**Quality Assurance is an integral part of Arex Advisor's capacity as full-service provider. In January 2022 the Quality team grew further with the addition of Pernilla Rådeström.**

**Pernilla is a Chemical Engineer by education, with most recent work experience as consultant in ProPharma Group. Joining in the role of Quality Assurance Expert, she has already begun working within a project on the customer's behalf.**

Pernilla obtained an MSc in Chemical Engineering from Mälardalen University. She maintained a focus on analytical chemistry before incorporating Quality Assurance into her professional profile. Working for Apotek Produktion och Laboratorier AB and as a QA consultant for ProPharma she accumulated extensive experience within both GDP and GMP. Among other things, she has performed QC analysis of drug products, acted as Responsible Person on Wholesalers Distribution Authorizations in Sweden, and Qualified Person for import and release of product, acted as QA contact for a contract manufacturing organisation (CMO), handled complaints, and has reviewed and approved GMP-documentation including change controls and deviations.

A few words from Linda Thunell, CEO at Arex Advisor: "Quality Assurance is in high demand with our customers, and Pernilla's arrival to Arex is well-timed indeed. The fact that she has skills and experience within both GDP and GMP is a clear asset for future client projects, not to mention her friendly and cooperative personality."

### About Arex Advisor:

*Arex offers strategic advice and operational support in pharmaceutical research and business development. Our mission is to help leaders and companies bring their projects to commercialization. We are passionate about the development process, leading to submission and a successful commercialization of important medicines – which ultimately helps to improve the lives of patients.*
